

# Why Choose Nationwide Children's Hospital's Inpatient Rehab Program?

---

1. The 2013 satisfaction rate of our customers, including patients, families, payer sources and referring physicians, was 100%.
2. We are accredited by The Joint Commission (TJC) and the Commission on Accreditation of Rehabilitation Facilities (CARF) for our comprehensive Inpatient Pediatric Specialty Program.
3. We are a pediatric family-centered inpatient rehabilitation program. The child/adolescent and family are the core of our Rehabilitation Team. Parents are considered an extension of their child, not a visitor.
4. Our most important goal of rehabilitation is to successfully return patients to home, school and community. Our successful school reintegration program involves the family and school as key players.
5. We are located within a 460-bed pediatric Level I Trauma Hospital, with direct and immediate medical services available.
6. Onsite services available:
  - Medical services – 24/7 in-house coverage
  - Diagnostic services (Radiology, Ultrasound, etc.) – results available within 4 hours, unless ordered STAT and then reported immediately
  - Laboratory services – results available within 4 hours, unless ordered STAT and then reported immediately
  - Pharmacy services – 24/7 availability
7. We feel that adolescents are not little adults but are individuals that are still developing and maturing, who need the “family-centered” approach to rehabilitation.
8. All of our patient rooms are private with an attached bathroom and tub/shower.
9. Parents are welcome to spend the night in their child's room. We also have a Ronald McDonald House located on our campus.
