## **Disruption of Early Immune Mechanisms in Nephrotic Syndrome May Limit Disease Damage and Prevent Further Injury**

Santiago Partida-Sánchez, PhD, principal investigator in the Center for Microbial Pathogenesis at The Research Institute at Nationwide Children's Hospital, is senior author of a study published in *Clinical and Experimental Immunology* that demonstrates how the initial acute phase of nephrotic syndrome leads to the recruitment of a second wave of inflammatory cells, resulting in kidney damage and disease aggravation.

### **Recent Publications**

View recent publications from investigators and clinicians affiliated with Nationwide Children's Hospital.

### **Research News Room**

## Deena Chisolm, PhD, Appointed to CMS Advisory Panel on Outreach and Education

Find out more about her two-year appointment within the Centers for Medicare and Medicaid Services.

### Planning, Teamwork and Technology Essential to Conjoined Twins' Separation

In a meticulously planned 16-hour operation, a 30-person team from four specialties successfully separated 11-month-old twins conjoined at the buttocks and lower spine. Read more on *Pediatrics Nationwide*, a magazine published twice yearly, with online articles on pediatric research, clinical innovation and education.

### Voucher Awards to Provide Research Funding Support

Learn more about these voucher awards, which are now available to investigators through select Shared Resources at Nationwide Children's via the Clinical and Translational Science Award.

### Current Clinical Research Studies
