

Dr. Maya Spaeth Joins Nationwide Children's Hospital

Maya Spaeth, MD, has joined Nationwide Children's Hospital as Co-Director of the Hand, Microsurgery and Brachial Plexus Program within the section of Plastic Surgery.

Congenital Hand and Brachial Plexus will use a multidisciplinary team approach lead by Plastic Surgery and Orthopedic Surgery. Hand and Microsurgery will specialize in these services: congenital hand differences, hand and wrist injuries, brachial plexus, facial reanimation, and microsurgical reconstruction. The addition of Dr. Spaeth brings an entire new service to Nationwide Children's Hospital, Brachial Plexus.

Dr. Spaeth has been published in leading professional publications, and is actively involved in research on congenital hand, brachial plexus and resident education. She comes to Nationwide Children's from Loma Linda University, where she served as Assistant Professor of Plastic Surgery and was actively involved in resident education.

Dr. Spaeth received her Bachelor of Science from the University of British Columbia and attended Medical School at the University of Calgary. She completed residency training in Family Medicine at Dalhousie and a second residency in Plastic Surgery at The Ohio State University Hospital. She finished a Hand and Microsurgery fellowship at Baylor College of Medicine and recently did two Observerships in Toronto and Boston for Brachial

Plexus and Facial Reanimation. She has received numerous honors and awards during her undergraduate, medical school, and residency training. These include: the Canada Science Scholarship and National Science and Research Council Awards during undergraduate training, the Dr. Peter Cruse Award for best medical student surgical research, and surgery research award during residency.
