Please note the following definitions for the "Unknown" and "Not Evaluated" answer options on this form.

**Unknown:** This answer option should only be selected if the TSS does not know this information after all efforts to obtain the data have been exhausted. If this answer option is selected for a question that is part of the HTMCP required data set, the TSS must complete a discrepancy note providing a reason why the answer is unknown.

**Not Evaluated:** This answer option should only be selected by the TSS if it is known that the information being requested cannot be obtained. This could be because the test in question was never performed on the patient or the TSS knows that the information requested was never disclosed.

### New Tumor Event Information

Complete this section if the patient had a new tumor event. If the patient did not have a new tumor event (or if the TSS does not know) indicate this in the question below, and the remainder of this section can be skipped.

#### i* New Tumor Event After Initial Treatment?
- ☐ Yes
- ☐ No
- ☐ Unknown

Indicate whether the patient had a new tumor event (e.g. metastatic, recurrent, or new primary tumor) after initial treatment.

<table>
<thead>
<tr>

If the patient did not have a new tumor event or if this is unknown, the remaining questions can be skipped.

#### ii Type of New Tumor Event
- ☐ Locoregional Recurrence
- ☐ Distant Metastasis
- ☐ New Primary Tumor

Indicate whether the patient’s new tumor event was a locoregional recurrence or a distant metastasis of the tissue submitted for TCGA; or a new primary tumor.

#### iii Site of New Tumor Event
- ☐ Bone
- ☐ Lung
- ☐ Liver
- ☐ Retroperitoneum
- ☐ Lymph Node(s)

#### vi Diagnostic Evidence of Recurrence / Relapse (check all that apply)
- ☐ Biopsy w/Histologic Confirmation
- ☐ Convincing Imaging (i.e. CT, PET, MRI)
- ☐ Positive Biomarker(s)

Indicate the procedure or testing method used to diagnose tumor recurrence or relapse.

#### vii Additional Surgery for New Tumor Event
- ☐ Yes
- ☐ No
- ☐ Unknown

Using the patient's medical records, indicate whether the patient had surgery for the new metastatic tumor event in question.

<table>
