Clinical and Research Supervision of Psychology Postdoctoral Fellows

2004-present    Research Supervisor  
Postdoctoral Fellowship in Pediatric Psychology  
Center for Biobehavioral Health  
The Research Institute at Nationwide Children's Hospital  
Provided direct supervision of research activities and mentorship regarding professional development for four postdoctoral fellows. One is a current fellow (Dr. Amanda Thompson) and three (Dr. Justin Yopp, Dr. Amy Baughcum, and Dr. Jamie Grollman) now hold clinical or faculty appointments at pediatric medical centers.

1997-2002    Clinical and Research Supervisor  
Postdoctoral Fellowship in Pediatric Psychology  
Division of Hematology-Oncology  
Cincinnati Children's Hospital Medical Center  
Provided direct supervision of clinical and research activities as well as mentorship about

professional development for four postdoctoral fellows. Two of these former fellows now hold research appointments in pediatric medical centers (Drs. Meg Zeller and Cynthia Gerhardt), one has an academic appointment at a liberal arts college (Dr. Mark McKellop), and one works with children and families in a clinical setting that provides structured training experiences to doctoral students in clinical psychology (Dr. Kristine Martin).

#### Clinical Supervision of Psychology Predoctoral Interns

- 2005-2008      Preceptor  
Predoctoral Internship, Pediatric Psychology Track  
Nationwide Children's Hospital  
Provided coordination of rotations, support, mentorship, and professional development for an intern over their year-long program. .
- 2003-present    Clinical Supervisor  
Predoctoral Internship, Pediatric Psychology Track  
Nationwide Children's Hospital  
Supervised on-call activities and provided case conceptualization training in scheduled rounds with three interns per year.
- 1994-2003      Clinical supervisor  
O'Grady Clinical Psychology Residency  
Cincinnati Children's Hospital Medical Center  
Provided direct supervision of clinical services to children on the hematology, oncology, and bone marrow transplant services for three interns per year.

#### Research Supervision of Medical Students

- 2004-2008      Research Mentor  
Roessler Research Scholarship Program  
The Ohio State University College of Medicine  
Supervised two-month summer research placements for five Med-1 students. These students received training in clinical research methods and ethics while contributing to funded research of pediatric cancer patients and their families.

#### Research Supervision of Undergraduate Students

- 2007-present    Undergraduate Research Supervisor  
Department of Psychology  
The Ohio State University  
Supervised research experience and independent readings for multiple undergraduate students.
- 1991 – 2003      Undergraduate Research Supervisor  
Department of Psychology, University of Cincinnati  
Division of Hematology-Oncology, Cincinnati Children's Hospital Medical Center  
Provided didactic instruction, discussion, and supervised experience in pediatric psychology research for numerous (~ 30-40) undergraduate students and recent graduate volunteers at Cincinnati Children's Hospital Medical Center.

## GRANTS AND CONTRACTS

### Active

- Gerhardt (PI), Vannatta (Co-I) \$1,139,048  
*Sibling and Parent Bereavement from Childhood Cancer*  
NIH R01 CA098217  
Dates for project: August 15, 2005 – April 30, 2010  
This investigation is a multi-site study of families who have recently experienced bereavement following a child's treatment for cancer using a short term (12-18 month) longitudinal design. Emphasis is on grief specific and developmental processes in siblings and parents using quantitative and qualitative data.
- Yeates (PI), Vannatta (Co-I) \$4,106,432  
*Social Outcomes in Pediatric Traumatic Brain Injury*  
NIH R01 HD048946  
Dates for project: August 1, 2006 – March 31, 2011  
This multisite study is an integrative study of the social outcomes following traumatic brain injury. Data collection involves assessments of neurocognitive functioning and social information processing, parent and child report measures of emotional and behavioral functioning, school based assessments of peer relations, observational assessments of social interactions, and neuroimaging with children following traumatic brain versus orthopedic injury.
- Compas (PI), Vannatta (Co-I) \$1,145,225  
*Parent-Child Communication about Cancer*  
NIH RO1 CA118332-01  
Dates for project: July 1, 2006 – June 30, 2011  
The objective of this study is to describe the content and process of communication about a child's cancer diagnosis and treatment using direct observations of parents and children as well as traditional self report measures. Longitudinal questionnaire assessments will also evaluate the association of communication and outcomes for children and their families.
- Mackner (PI), Vannatta (Co-I) \$1,679,563  
*Social Functioning in Adolescent Chronic Illness*  
NIH R01 MH079132-01  
April 1, 2008 – March 31, 2013  
This is a short-term longitudinal study of adolescents (age 11-16) with recent onset of irritable bowel disease (IBD). Assessments include adolescent perceptions of social challenges, coping with social stress, peer relationships, and depressive symptomatology.
- Walz (PI), Vannatta (Consultant) \$100,000  
*Social competence with peers following early childhood traumatic brain injury*  
NIH RO3 HD055218  
July 1, 2008 – June 30, 2010
- Salley (Rutherford) (PI), Vannatta (Co-I, Mentor) \$100,000  
*Exploration of Social Information Processing in Pediatric Brain Tumor Survivors*  
NIH RO3 CA 138122  
September 17, 2008 – September 16, 2010
- Hamiwka (PI), Vannatta (Co-I) \$78,000  
*Peer Relationships among Children with Epilepsy*

Epilepsy Foundation of America  
July 1, 2009 – June 30, 2010

**Completed**

- Vannatta (PI)  
*Psychosocial Outcomes of Pediatric Brain Tumor Survivors* \$1,725,000  
RSGPB-03-098-01-PBP  
American Cancer Society  
Dates for project: July, 2003-June, 2009  
This is a multi-site study to investigate the social, emotional, behavioral, and family functioning of school age children treated for intracranial tumors. Identical data are obtained for these children ( $N = 200$ ) and comparison classmates ( $N = 200$ ) from multiple sources in schools (teacher, peer, self-report) and homes (mother, father, and child-report). Analyses will focus on mechanisms that mediate and moderate differences in outcomes. This work will aid efforts to prevent or ameliorate long-term psychosocial morbidity in brain tumor survivors. Collaborating centers are Dana Farber Cancer Institute, Medical College of Wisconsin, the Hospital for Sick Children, and the University of Colorado Health Sciences University.
- Phipps (PI), Vannatta (Site-PI) \$ 642,470  
*Psychosocial Impact of Pediatric Bone Marrow Transplant*  
NIH RO1 CA60616  
Dates for project July, 2002 - June, 2006  
This was evaluation of a health promotion intervention for children undergoing bone marrow or stem cell transplantation. The randomized clinical trial was based on a positive psychology framework that was designed to increase the experience of positive affect and reduce somatic distress and mood disturbance.
- Gerhardt (PI), Vannatta (Co-I and Mentor) \$ 148,000  
*Adjustment of Pediatric Brain Tumor Survivors*  
NIH RO3 CA097740-02.  
Dates for project: July, 2002 – June, 2004  
This exploratory grant obtained pilot data on social functioning, emotional well being, and family adjustment of pediatric brain tumor survivors for a larger multisite study that is still ongoing.
- Vannatta (PI) \$ 460,214  
*Family Impact of Maternal Cancer: A Case-controlled Study of Children and Families.*  
NIH RO1 MH59119-01A1  
Dates for project: October 1999 - June 2005  
The impact of maternal breast cancer was evaluated children age 8-16. Peer, teacher, parent, and child assessments were obtained of child social, emotional, and behavioral functioning, parental distress, and family relationships. Identical data were collected for families experiencing maternal cancer and families of comparison children from similar demographic backgrounds. Analyses have tested group differences as well as associations of parent distress and family relationships in relation to child adjustment.
- Dietrich (PI), Vannatta (Co-I) \$1,040,656  
*Early Exposure to Lead and Adolescent Development*  
NIH R01 ES 08158-01A1 HUD  
Dates for project: October 1996 - April 2000
- Vannatta (PI) \$ 15,000  
*Pediatric Migraine: Depression and Related Symptomatology.*  
The American Association for the Study of Headache  
Dates for project: June 1998 - May 2000
