Weekly COVID-19 Dashboard
Hospital and Public Data

October 14, 2020
Notes

• The following data only reflect pediatric patients with COVID-19 testing obtained at NCH. In addition to testing patients with symptoms suspicious for COVID-19, testing indications at NCH also include testing all hospitalized patients (regardless of indication for admission) and all patients prior to procedures.

• For the above reasons, these data are not broadly generalizable to the entire pediatric population of Central Ohio. Clinicians should refer to their local public health department for further information.

• Currently observed burden and acuity of COVID-19 and MIS-C at NCH is relatively low relative to reports from other large children’s hospitals located within epicenters of outbreak.
## Data Dictionary

<table>
<thead>
<tr>
<th></th>
<th>Clinical</th>
<th>Surveillance</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Inpatient</strong></td>
<td>Testing performed on hospitalized patients with signs or symptoms of COVID-19</td>
<td>Routine admission testing upon hospitalization of asymptomatic patients</td>
</tr>
<tr>
<td><strong>Outpatient</strong></td>
<td>All outpatient testing not obtained for operative or procedural indications</td>
<td>Routine testing prior to scheduled operation or procedure</td>
</tr>
</tbody>
