

## Synagis Season 2020-2021 Preparation Checklist for Providers

### July – August

Please confirm if you have any second season Synagis patients by calling one of the Nationwide Children's Hospital Homecare Synagis Coordinators listed below.

- **Amiee Olvera, Service Coordination and Access Lead**  
(614) 355-0531
- **Abby Miley, Synagis Service Coordinator**  
(614) 355-1177

### September

Send all Synagis patient referrals with signed physician orders, including second season and any new referrals – Medicaid and all Managed Care - to Amiee or Abby, so prior-authorizations can be confirmed. Once prior authorizations are complete, first Synagis doses will be scheduled for November.

### October

Continue to submit all Synagis patient referrals, with signed physician orders so prior-authorizations can be completed for all your RSV patients receiving Synagis. Once prior authorizations are complete, first Synagis doses will be scheduled for November.

### November

First Synagis doses scheduled are provided to patients.

### December – January

Physicians and Homecare confirm if there are any changes in insurance coverage for patients continuing Synagis dosing beginning January 1, 2021. Contact Amiee or Abby if you know of insurance coverage changes with any of your Synagis patients.

### March

Typically, last Synagis doses are provided to patients during this month.

- Homecare representatives are available to *virtually* meet with Office Managers for those who would like to discuss the Synagis referral process. To learn more visit **NationwideChildrens.org/Homecare**, on the Professionals page, open the Synagis tab for updated forms. If you have questions, or would like us to schedule a meeting with you and/or your staff, call Carolyn Figi at 614-355-1112.
