

More Time for Play, Learning and Growing Thanks to Vaccines

DID YOU KNOW?

Vaccines are one of the most effective ways to protect babies and children from serious illness, hospitalization and even death.

HOW IMMUNIZATIONS WORK

Immunization builds long-term protection before your baby or child is exposed to serious diseases.

With immunizations, your family can:

Reduce the risk of serious illness and hospitalization

Protect others in the community

Spend more time learning and playing

Grow and thrive!

We're committed to helping families make informed decisions about their child's health. **Talk with your child's primary care provider if you have questions or concerns.**
