See Key (below)

Block Rotation Key:

PGY 3 through PGY5 Years consist of 13 four-week Blocks

Continuity clinic occurs one half day each week during all rotations, except for the night float weeks.

Pediatric Inpatient Service consists of a mixture of ED, Hospital Peds and PICU/NICU consults.

Adult ED consists of an ambulatory/outpatient rotation for our PGY3's.

Night float consists of a mixture of ED, Hospital Peds and PICU/NICU consults for 5-6 consecutive nights for 2 weeks at a time. Residents are not scheduled more than 6 weeks per year for PGY 3 and PGY4 years, and 4 weeks per year for PGY 5 year.

Pediatric Outpatient Clinic allows residents to rotate through a variety of child neurology attending clinics including: General Neurology, Headache, Stroke, Neuromuscular, Tic/Tourette's, Epilepsy, Psychogenic Nonepileptic Events, Neuroimmunology and Idiopathic Intracranial Hypertension clinics.

Elective rotations can consist of the areas listed below, depending on the interests of the resident. The percentage of time devoted to outpatient activities in these specialties varies from 10% (in clinical informatics) to 90 percent in most others. Residents selecting a research elective spend 90% of their time doing research and 10% in outpatient clinic.

- EEG (10% outpatient. All residents have at least 3 blocks of EEG elective assigned)
- EMG (10% outpatient)
- Neuro Radiology (10% outpatient)
- Neuropathology (10% outpatient)
- Pain Management and Rehab (at least 10% outpatient, inpatient vs outpatient ratio is variable)
- Palliative Care (at least 10% outpatient, inpatient vs outpatient ratio is variable)
- Research (10% Outpatient, 90% Research)
- Other electives are available per resident interests, including away electives
