

Sudden Cardiac Death in Duchenne Muscular Dystrophy and Becker Muscular Dystrophy: Incidence and Prevention Patient Registry

This patient registry will determine the rate at which children suffer from sudden cardiac death, and whether current therapy with internal cardiac defibrillators is beneficial. This will be an international, multisite study.

Qualified participants must be at least 10 years old, have Duchenne Muscular Dystrophy or Becker Muscular Dystrophy, and abnormal heart function (ejection fraction less than 55%) or a heart device (ex. pacemaker, ICD).

**If you feel you may be eligible, please call: 614-722-0494 (U.S. calls)
Country Exit Code-1-614-722-0494 (calls outside of the U.S.)**

This registry has been approved by the Institutional Review Board at Nationwide Children's Hospital.
