Fueling your thoughts

- Are you concerned about your child’s weight?

- Are you concerned with your child’s eating habits or level of physical activity?

- Do you and your child eat breakfast?

- How many meals do you eat as a family each week? How many are from fast food, take out, etc?

- What beverages do you buy for the family?

- How much time does your child watch TV, play on the computer, play videogames, or text daily?

- What do you do as a family to stay active?

By providing nutritious foods to your child you help him or her improve strength, energy, attention span and the ability to keep up with friends.

**Breakfast** ~ Eating breakfast every day helps children do well in school and improves overall health.

**Lunch** ~ Buying school meals can be nutritious; review school menus with your child and plan ahead. When packing lunches it is important to include at least 4 out of the 5 food groups (low-fat/fat-free dairy foods, fruits, vegetables, whole grains and lean protein).

**Snacks** ~ Eat only when hungry. Stock up on ready-to-eat vegetables, fruit, low fat cheese, yogurt, milk, lean meats, whole grain crackers, bread, low sugar cereal or nuts.

**Dinner** ~ Eat as many meals as possible as a family at the dinner table. Be sure to slow down, enjoy, and turn off the TV.

**Eating Out** ~ Keep portion sizes small or share meals (don’t “super size”).

- Choose fruit or salad instead of French fries, milk instead of pop, baked or broiled instead of fried.

- Limit dressings and mayonnaise; ask for them on the side or choose low fat options.

**Beverages** - Think your Drink!

- The best choices are water, low fat (1%) or nonfat skim milk and 100% fruit juice (limit fruit juice to 1 cup or 8 oz. serving per day).

- Limit sweetened beverages such as soft drinks, punch, juice drinks, energy drinks and caffeine containing beverages.

- Regular intake of too much caffeine can lead to trouble sleeping, rapid heartbeat, anxiety, poor attention span, headaches or shakiness.

Your main job as a parent is to be sure that your child is served a variety of healthy foods (fruits, vegetables, milk, yogurt, cheese, whole grains, meat, poultry, fish & eggs). Be a good role model for your kids by eating and choosing healthy foods. Visit [www.mypyramid.gov](http://www.mypyramid.gov) for more information.

Be Active

- Make sure you and your kids are active 60 minutes every day. Focus on FUN, including both organized and free play.

- Count time spent doing chores: car washing, walking the dog, dusting, sweeping, pulling weeds, raking leaves or shoveling snow.

- Involve the whole family in physical activity because you are role models!

- “Screen time” (computers, TV, gaming systems, texting, etc) should be limited to 2 hours or less daily (pre-plan how “screen time” will be used).

- Screens may be monitored easily if moved to a common area; keep them out of child’s bedroom.

- Make sure your child is sleeping at least 10-11 hours per night. Keeping regular bed time is critical to good health and weight maintenance.

- If you have concerns about your child’s weight, physical activity or eating behaviors, ask your healthcare provider.
