Who We Are

Clinical Research Operations (CRO) at Nationwide Children’s Hospital is a full-service project management office for clinical trials. Our focus on disease team buy-in, risk mitigation, operational processes and workflows enables us to provide the results our teams need to bring advanced therapeutics from the bench to the bedside. Our team has expertise in international clinical trial management, and over 30 faculty who are disease-specific experts. Our faculty have received extra training in clinical trials and drug development and many are Association of Clinical Research Professionals (ACRP)-certified principal investigators. Additionally, our clinical research associates are certified through the Society of Clinical Research Associates (SOCRA).

When you work with us, you get a dedicated project manager who will build a custom team of experts to meet the unique needs of your trial. From budget support to clinical staff, our team’s diverse resources come together to get your trial into the clinic.

In the last 5 years, we’ve accomplished great things.

From adding efficiencies and streamlining processes to increasing the numbers of new trials and patient enrollments, the CRO at Nationwide Children’s is invested in growth and innovation for continuously improving results.

“Our goal is best outcomes for all patients, regardless of where they in the world or in their care path. We have over 170 clinical research protocols to date, and through the NEXT Consortium continue to build a network for innovative therapies with 36 institutions on board already. Best outcomes are achieved together and we’re positioned to keep this collaborative philosophy growing.”

– Myeshia Harmon, Director of Clinical Research Office for Hematology, Oncology, and Blood & Marrow Transplant

CRO Trials and Enrollments

(2013-2017)

	2013	2014	2015	2016	2017
Number of new trials opened	27	30	35	23	33
Number of enrollments	213	296	345	668	657

CRO Overview

	2017
CRO staffing	25 FTE
New enrollments	657
Data currency COG	>99%
NEXT Consortium members	38

The NEXT Consortium –

Just One Example of What We Can Achieve

The NEXT (National Experimental Therapeutics) Consortium is a premier collaborative research infrastructure for investigator-initiated studies that contribute to the early development of new therapies in pediatrics.

Through the NEXT Consortium, we've streamlined the clinical trial infrastructure through centralized reviewing IRB, data capture and reporting, and funding and fiscal management.

Head Start 4 is the NEXT Consortium's first clinical trial protocol launched in the United States and around the world, with collaborative discussions with institutions in Canada, New Zealand, Australia, Brazil, Saudi Arabia, and the United Kingdom.

Visit NationwideChildrens.org/Next-Consortium to see our latest partnerships.

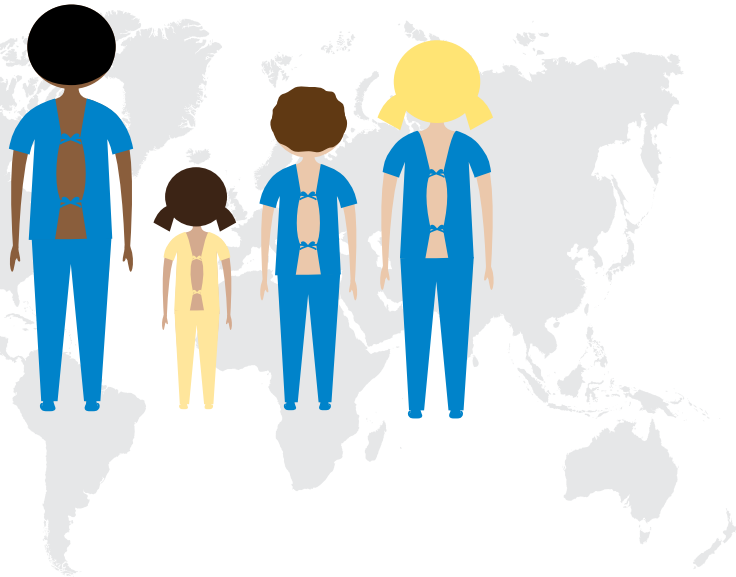

Head Start 4 – States with Open and Activated Sites

**As of March 2018, NEXT had 36 participating sites*
