**Formula Qty:** 100mL  
**Shelf Life:** 90 days

**Equipment needed:**  
Mortar, pestle, graduated cylinder, stirring rod

**Auxiliary Labels/Storage:** Shake Well; Refrigerate (preferred) or Room Temperature

**Directions:**
1. Place tablets in a mortar. Add a small amount of Ora-Plus and allow to sit for a few minutes to soften tablets.
2. Crush tablets and levigate to form a viscous, but smooth and uniform paste.
3. Continue adding Ora-Plus, geometrically, mixing well after each addition.
4. Transfer to a graduate.
5. Rinse mortar with Ora-Sweet, adding rinse to graduate.
6. QS to final volume with Ora-Sweet. Stir well.

**Note:** Consider using commercially available Topamax Sprinkles® instead of extemporaneously compounding the suspension. Do not use Ora-Blend; the vehicle does not produce a uniform suspension.
