

Delivering Best Outcomes for Our Patients

Nationwide Children's Hospital, one of America's largest pediatric health care and research centers, is home to our nationally recognized and accredited pediatric Inpatient Rehabilitation Program. Nationwide Children's is one of the only freestanding pediatric hospitals in the country with an inpatient rehab program, in addition to a verified Level I Trauma and Burn Program, allowing us to provide comprehensive care for trauma patients. The Rehab Program also serves patients who have had a decline in function after a significant illness or surgery.

Our **MISSION** is to provide comprehensive, family-centered physical rehabilitation services while embracing the diverse and individual needs of each child and family.
