Focus on Children and Young Adults

More than half of our patients are pre-teens/teenagers.

Age Groups

Return to Home

In 2018, nearly 100% of our patients returned home - surpassing the national average.

Discharge to Home

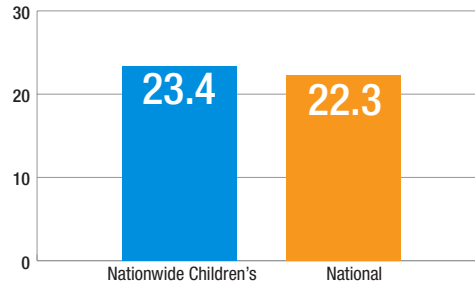

Customer Satisfaction

In 2018, 100% (121/121) of our patients and families reported satisfaction with our program. 100% of parents stated they would recommend Nationwide Children's Hospital to others.

National Outcomes

The WeeFIM[®] is a tool used to measure the level of assistance needed by the child to perform basic life activities effectively. The high rating indicated a greater level of independence. In 2018, our patients made more "functional" gains towards independence.

WeeFIM[®] Point Gain

Nationwide Children's Hospital would like you and your family to have the best possible experience while in our care. Our goal is, and always will be, to exceed your expectations.
